***Reasons for Allowance***

1. Claims 21-32 are allowed over the cited prior art.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 21, 31, and 32, the cited prior art fails to disclose or fairly suggest the device for segmenting a radio frequency network comprising: at least one module for receiving and segmenting radio frequency network signals, said module having a housing defining an interior; said housing having a back of electrically conductive material and a front; a plurality of coax connectors mounted on said back of said housing with outer shields of said connectors electrically coupled to said back of the housing; radio frequency circuitry for performing segmenting functions, said radio frequency circuitry at least partially within said interior of said housing, said radio frequency circuitry being electrically interconnected with said coax connectors; front face structure defining a plurality of openings, wherein said front face structure otherwise generally covers said radio frequency circuitry, said radio frequency circuitry further including a plurality of removable plugs for modifying the network signals; each of said plugs being accessible from said front of said housing; a removable cover mounted to said housing for covering said plurality of plugs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Terminal Disclaimer***

3. The terminal disclaimer filed on 06/26/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,049,709 has been reviewed and is accepted. The terminal disclaimer has been recorded.
